

# Bagula Private ITI Institution: Campus Area and Infrastructural Facilities

Bagula Private ITI Institution, Bagula, affiliated to the National Council for Vocational Training (NCVT) is one of the best institute in the Nadia district. As per infrastructural facilities are concerned the institute has one old main building and new building. Each building is provided with well illuminated, spacious classrooms, staff rooms and separate toilet arrangement for boys and girls. The institute is trying to upgrade its classrooms and laboratories with the modern equipment and tools to facilitate effective teaching learning through modern tools and techniques. At present the college has well-ventilated classrooms, administrative office, a central library. The most spacious classroom with LCD projector facilities of our institute. Though there are no specific infrastructural facilities for differently-abled students, the institute is sensitive towards such students and extends its full co-operation. In addition a huge playground in front of the institute are there. The institute provides an eco-friendly environment to its students with rainwater harvesting and other green initiatives. The institute has taken measures to address the need for vigilance and security. The institute campus is CCTV enabled to cater to the comprehensive safety requirements of a campus. Adequate purified drinking water facilities are available for the students and staffs of our college. Adequate toilet facilities for staff and students are also available and regularly maintained by the sweeper of the college. Continuous power supply is ensured by the generator. Waste bins are placed at different places within the institute campus to keep the campus clean as a measure of waste management system.

## **A. Class Rooms**

Bagula Private ITI Institution has 21 class rooms for taking theoretical classes and 16 workshops to explore experimental learning. Each of these rooms is equipped with black as well as white boards, adequate desks and benches. All the class rooms of main building are Wi-Fi enabled. Sometimes classes are conducted in laboratories also due to the insufficient number of class room.
